---

EPA team, here is our cut at defining some discussion topics for our Wed afternoon stormwater meeting this week, from 1-4 PM. Let's meet at NWR in Room 1 by the front door. Let me know what you want to add or comments you have.

Sylvia, we'll dial you in by phone. How about you Kristine?

1. Walk through of DEQ approach to implementation of JSCS for management of stormwater at specific sites. Examples provided of low, medium and high priority decisions. Describe use of weight of evidence approach for medium priority sites.
2. Update on DEQ work with the City, the IGA position and the DEQ stormwater work group. Much of that work is focused on developing a new approach to stormwater permitting designed to adequately protect PH from stormwater contamination.
3. Integrating individual site efforts with broader DEQ stormwater work group deliverables- some scenarios.
4. EPA concerns, comparison of possible approaches for stormwater evaluation
6. How will decisions be made before and at the ROD time- for known contamination SW pathway sites, suspected, and unknown. Where is City's/RPs liability- what info will be required.
7. Next steps to creating a shared vision
